

# How to Interact with your Buyer Tour

If we are taking a person on a tour of listings to see potential homes, we can help ourselves by creating a buyer tour! This will show your people the listings your are going to visit and the route of how to get there! From this report, they can also give you reviews and rate the listings you went to visit!

## Interacting with your Buyer Tour

1. Start by emailing your Presentation to your client.

2. Your client will then see an email that looks like the one below!
