Saving a Custom Module in Page Builder

Page builder has may features that can help agents create amazing websites. A great tool agents can utilize to help them build their website is the Save option on Page Builder modules. This will allow you to add all your settings and desired content into a module and then save it so you can apply it to other pages across your site.

Saving a Custom Module in Page Builder

1. In Page Builder, **add** the module you would like to save to your page by dragging and dropping it to your page, then making any desired changes (see below).
