## **Editing Your Homepage**

First impressions are the most important! Using your Agent Website's mobile-friendly design, high-resolution images, and custom fields, make sure your first impression turn your site visitors into new leads and repeat clients.

To customize your Website homepage, follow these steps:

1. From the Admin Tool, select the **Homepage** button on the left side of the screen (see below, indicated by the red arrow).

2. Each layout will make the editing options slightly different. Example below is using the Search Focused layout.

- a. HOMEPAGE NAME: Change this name to what you wish the public to see.
- b. BACKGROUND IMAGE: Use the Upload or Choose an image button to select an image that best reflects the style that represents you best. Use the pixel dimensions (highlighted in yellow above) to determine image size.
  - i. **NOTE**: When using your own image, instead of images from the provided library, you must confirm that you either own the copyright to the photo (i.e. you took the photo yourself), or you have written permission from the copyright owner to use the photo for commercial purposes online, as required by Terms of Use.

c. **SEARCH BAR TEXT:** Add the two lines of text that will be visible as people scroll down your homepage (see search bar example below).

YOUR BROKERAGE	Home	Properties •	Buying & Selling 🝷	About Me •	Blog	More •	Dawn McLellan 🌞 McLellan	
Dawn McLellan	Contact Me				Neig	hborhood	City, ZIP, or MLS# <b>Q</b>	

- d. **HEADLINE:** Select the statement that will be front and center on your homepage.
- e. **PROFILE SETTINGS:** Your contact information, and agent image, will automatically be included from the details in your account. You can alter this to whatever you would like the public to see.
- f. **WELCOME TEXT:** Use the rich text editor to create messaging directed at your public.

g	Featured Properties Module (Whee's chia?)
	Title Featured Properties
	Property List My Office's Listings 💟 Create a Property List
	Number of properties to display 20
	Blog Module (Whor's this?)
	Title Blog
	Post Category All
	This module displays posts from your blog. To display only posts of a centain category, choose that category from the drop-down list: otherwise choose All. For some themes, this module also includes links to the social media pages that you specify on the <u>Social Media Settings</u> page.
